ERRATUM

Key, J.D., 'Some Maximal Subgroups of $PSL(n, q)$, $n \geq 3$, $q = 2^r$ ', *Geometriae Dedicata* **4** (1975), 377–386.

The group K mentioned in the statement of the Theorem (page 377) and in Lemma 7 (page 384) is not isomorphic to $PSU(4, 9)$ as stated, but to the extension of $PSU(4, 9)$ by an involution acting on $PSU(4, 9)$ as the involutory field automorphism. I thank W. Kantor for pointing out this error to me.
