ERRATUM

G. Paoli, M.G. Franceschi — Genetic variations in time and space in Massa Carrara population (North West Tuscany - Italy). *International Journal of Anthropology*, Vol. 6, No. 4: 207-215, December 1991.

Many imperfections and errors, not imputable to the authors who never received the proofs, were made in the above article. We want to draw the reader's attention to the most important among them:

pag. 208, line 3-6: correct version:

... The most industrialised and developed area is the coastal strip, where today more than two thirds of the population (790. 75 inhabitants for Km²) live...

pag. 209 and pag. 212: Nei's quotation: 1973 instead of 1977.

pag. 210, line 1-3: correct version:

Data on phenotype frequencies are listed in Table 2. Chi square values among geographical subdivisions for both the chronological periods are reported in Table 3.

In consequence of the above correction, the subsequent numbering of each table quoted in the text must be increased by one.

pag. 210, Table 2: Cluster M4, first period (kk phenotype): 329 instead of 392.

pag. 214, References: add:
