Addendum To
"A LOWER BOUND FOR THE NUMBER OF SINGULAR SATURATED
MAIN EFFECT PLANS OF AN S^M FACTORIAL"

B. L. RAKTOE AND W. T. FEDERER

The following omissions should be added to the paper which appeared in the Ann. Inst. Statist. Math., 22 (1970), 519-525:

Line 23 on page 522 should read: ...as described earlier such that a main effect or two-factor interaction is completely confounded with the mean, then...

Line 15 on page 523 should read: ...implies that a subclass of the class of all...

Line 7 on page 524 should read: ...not of type D of Theorem 2.2 and...
