Errata

'Sonic phase delay from trachea to chest wall: spatial and inhaled gas dependence': S. Patel, S. Lu, P. C. Doerschuk and G. R. Wodicka

vol. 33, no. 4, pp. 571-574

The illustrations in Figs. 1 and 2 (p. 573) were erroneously transposed. The correct illustrations and captions are shown below.

Fig. 1 Representative plot depicting the effect of vertical measurement site (T_3 , T_{5-6} , T_8) on the frequency-dependent phase delay τ up to 1200 Hz during air breathing

Fig. 2 Representative plot showing the effect of inhaled gas composition (HeOx, Air, SF_6Ox) on phase delay τ as a function of frequency at the right T_8 posterior chest site

'High-quality compressions of echographic images by means of neural networks and vector quantisation': S. Conforto, T. D'Alessio, E. Zanette and G. Mancini

vol. 33, no. 5, pp. 695-698

In the first column in Table 1 (on p. 698) CDA should be replaced by HCA.

In the third paragraph on p. 698 the second sentence should read as follows:

The interesting aspect is that this SNR (in the mean 3 dB lower than that of the training image) gives rise to images that may be useful in diagnosis.
