CORRECTION TO
“PROPERTIES OF DUALITY IN TANDEM QUEUEING SYSTEMS”

GENJI YAMAZAKI AND HIROTAKA SAKASEGAWA

In the corollary to Theorem 1 of the above paper (this Annals 27 (1975), pp. 201–212), “distribution” should be read as “expectation.” The correct statement of the corollary becomes as follows.

COROLLARY. In tandem queueing systems described above, the expectation of interdeparture time between the n th and the $(n+1)$ th customers remain unchanged even though the order of service is reversed.
