Erratum

Dr. Jürgen Kollath was mistakenly named as the first author of the paper: "Dilation of Esophageal Stenosis by Balloon Catheter" which appeared on pages 35–39 of Volume 7. In fact the two authors of the paper were Drs. Erhard Starck and Paolucci Vittorio. We regret this error.

Book Review

Thoracic Oncology. Edited by Noah C. Choi and Herman C. Grillo. 1983. Subject index, 83 figures, U.S. \$ 39.50. ISBN 0800-434-1, 494. Raven Press, New York.

This book presents a multidisciplinary approach to the diagnosis and management of thoracic neoplasia that should be welcomed by the various specialties in thoracic medicine. Diagnostic oncoradiology, in particular, is described clearly and concisely. Percutaneous aspiration biopsy is also discussed thoroughly and supported by the extensive experience of the thoracic radiologist. The role of other specialties, i.e., pathology, surgery, radiotherapy, and chemotherapy, is fairly well-defined,

yet the interdependence of the opinions from these specialties concerning the best management of the patient is evident in the chapters written by experts in these respective fields. The illustrations cover the common manifestations of thoracic neoplasia, using various imaging modalities including an adequate number of computed tomography examinations.
