ERRATA

Development and Characterization of Cell Lines of Normal Mouse Bladder Epithelial Cells and 2-Acetylaminofluorene-Induced Urothelial Carcinoma Cells Grown in Monolayer Tissue Culture.

John J. Berky and Laurence Zolotor

Page 69 (left column, last sentence)—substitute: “Karyotypic analyses would indicate the carcinomatic cell line to be near-tetraploid or heteroploid with the ploidy of multinucleated cells as yet unresolved.”

Page 72 (left column, 1st paragraph, last sentence)—substitute: “That the cells of the tumorigenic line have colchicine arrested metaphase modal numbers of 80 may be indicative of a near-tetraploid line which also contains many multinucleated cells of as yet undetermined ploidy.”

Cytology of Spontaneous Neoplastic Transformation in Culture.

Sandra L. Handleman, Katherine K. Sanford, Robert E. Tarone and Ram Parshad

Page 530 and 531. Fig. 3 should be identified as “rat cell lines” and Fig. 4 should be identified as “mouse cell lines.”
