Correction to *Metall. Trans. B*, 1984, vol. 15B

Phase Relationships in the Fe-Cr-C System at Solidification Temperatures
by D. M. Kundrat, M. Chochol, and J. F. Elliott

Page 670:

The figure caption should read:

Fig. 7—Comparison of liquidus isotherms in the iron-rich Fe-Cr-C system, calculated by the model with (continuous line) and without (dashed line) the ternary parameters and adjustments in the limiting Cr-C system.

Page 675:

Column 1 of Table A-V should read:

$7,531.0 \pm 4000$

Correction to *Metall. Trans. B*, 1985, vol. 16B

The Solubility of Barium Arsenate: Sherritt's Barium Arsenate Process
by R. G. Robins

Page 404:

The third and fourth lines from the bottom should read:

The Sherritt Patent is obviously based on the solubility data for $\text{Ba}_3(\text{AsO}_4)_2$ originating from Chukhlansev's work.

Page 405:

The last line of column 1 should read:

$\text{Ba}_3(\text{AsO}_4)_2$: $\Delta G_{f,298.15}^\circ = -3082 \text{ kJ}$.
