Stationary Regimes of a Plasma Diode.

A. SESTERO and M. ZANNETTI

*Laboratorio Gas Ionizzati (Associazione EURATOM-CNEN) - Frascati**(Nuovo Cimento, 51 B. 230 (1967))*

The following corrections are brought to the reader's attention.

On page 231, last line before eq. (5), the word « by » after the parenthesis is to be replaced by a *colon sign* (:).

On page 233, 8th and 9th lines, the sentence between the words printed in italics and the words in parentheses is to be rephrased as follows: « ... the reason being that the density of these particles *in the plasma region is greater than that of the particles* emitted from the other electrode ... ».

On page 234, 6th line, the indication « Fig. 1 » is to be replaced by « Fig. 3 ».

On page 234, caption of Fig. 3, the remark in parentheses « logarithmic density scale » does not belong there, but to Fig. 1.
