The Effect of n-p Tensor Interactions in ${}^3\text{H}_\Lambda$ on Λ -p Scattering Parameters.

R. SCHRILS and L. D. BUXTON

*University of Kentucky - Lexington, Ky.**(Nuovo Cimento, 54 B, 267 (1968))*

On page 267, in the title, the word « Paramaters » should read « Parameters ».

On page 276, line 17, « ... such as strict ... » should read « ... such a strict ... ».

On page 276, line 21, « $B_\Lambda({}^3\text{H}_\Lambda) = -0.251 \text{ MeV}$ » should read « $B_\Lambda({}^3\text{H}_\Lambda) = 0.251 \text{ MeV}$ ».

On page 278, line 4, the word « kinematic » should read « kinetic ».

On page 279, lines 2 and 3, the matrix elements should include an over-all factor of $q^4/8\pi^2$ under the integral sign.

On page 279, lines 5 and 6, the letter « F » should be replaced by the letter « T ».
