On page 46, under “Analysis of Data,” sentence 2 should read:

Student’s t-test was performed as a test of significance for comparing 2 groups with regard to parametric data, Mann-Whitney U-Test for non-parametric data, while the chi-square test with continuity correction factor was used for noncontinuous variables (enumeration data).

On page 47, the last line of the footnote to Table 2 should read: “*(mean $\pm$ SD).”
