Pulsar Restlessness as Induced by an External Source.

M. CERDONIO and S. VITALE

*Dipartimento di Fisica, Libera Università di Trento - 38050 Povo, Trento, Italia**(Lett. Nuovo Cimento, 32, 302 (1981))*

In eq. (1) $-\ln d$ should read $-n \ln d$.

On page 305 at the end of thirtieth line (*) should read (*).

On page 306, seventh line, $F \simeq 10$ dyne should read $F \simeq 10^7$ dyne; nineteenth line, of amplitude $\sim 10^{-5}$ cm should read of amplitude $\sim 10^{-15}$ cm.
