A Temperature Dependent Lamb Shift.

S. M. MOORE

*Universidad de los Andes, Departamento de Física
Apartado Aéreo 4976 - Bogotá, Colombia, S.A.*

(*Lett. Nuovo Cimento*, **23**, 195 (1978))

The statement of the above-mentioned paper: « In this letter we would like to indicate a prediction of stochastic physics heretofore not considered by quantum physics » is wrong. The prediction of the temperature dependent Lamb shift was considered before in quantum physics at least on two occasions ^(1,2).
