Formula (5) of this paper must be substituted with

$$I_2(\varrho, v) = \frac{\pi^2}{8 \sin \pi \varrho} (v-1)^{\varrho+1} [4F(-\varrho-1, -\varrho; 2; 1|(1-v) - 3F(-\varrho-1, 1-\varrho; 3; 1|(1-v))].$$

The other formulae remain unchanged, as well as the numerical results and the conclusions.
