ADDENDUM

TO

On the Masses and Modes of Decay of Heavy Mesons Produced by Cosmic Radiation.

(G. STACK COLLABORATION)

Nuovo Cimento, Vol. 2, 1063-1103 (1955).

The Authors of the above article regret their omission from Appendix II, pag. 1101, of the following Section:

« 3b) *Error.* The error on $p\beta$ measured by scattering was determined from the formulae of Molière-d'Espagnat ⁽¹⁾, modified to take into account the non-normal distribution of the angles of scattering ⁽²⁾. The relative curves and experimental values can be found in two contributions on scattering ^(3,4), to the Pisa Conference ».
