Radiative Corrections to $\pi \rightarrow \mu$ (or e) + ν with Finite Neutrino Mass.

A. N. KAMAL

*Institute of Theoretical Physics, University of Alberta - Edmonton, Alberta**(Nuovo Cimento, 33, 1108 (1964))*

Instead of $\frac{13 - \mu^4}{\mu^2(1 - \mu^2)^2}$ in the Note added in proof read $\frac{1 - 3\mu^4}{\mu^2(1 - \mu^2)^2}$.

Nambu-Fröhlich Mass Rule and Okubo-Gell-Mann Mass Formulae.

M. UMEZAWA

*Institut de Recherches Nucléaires - Strasbourg**(Nuovo Cimento, 33, 1481 (1964))*

The following corrections should be made to this paper:

on p. 1483, eq. (9), replace $\left\{ + 2H_3 - \frac{1}{2}(H_3 H_3 + \sum_{i=1,2} E_{3i} E_{i3}) \right\} 137 m_e c^2$ by

$$(9) \quad \left\{ + 2H_3 - \frac{1}{2}(H_3 H_3 + \sum_{i=1,2} E_{i3} E_{3i}) \right\} 137 m_e c^2 ;$$

on p. 1483, eq. (10), replace $-\left\{ H_3 H_3 + \sum_{i=1,2} E_{3i} E_{i3} \right\} 137 m_e c^2$ by

$$(10) \quad \left\{ -H_3 - (H_3 H_3 + \sum_{i=1,2} E_{i3} E_{3i}) \right\} 137 m_e c^2 .$$
