The possible identification of this most dominant singlet state in the crossed channel of the multiperipheral diagram with Pomeranchuk particle has already been discussed in the previous paper ⁽¹⁾.

* * *

The author would like to express his sincere thanks to Profs. O. HARA, H. SUURA and Y. MIYAMOTO for their encouragements. He is also very grateful to Mr. M. ICHIMURA and Mr. H. KANASUGI for discussions of the mathematical problems.

Coupling Constants in Broken Unitary Symmetry.

B. DIU, H. R. RUBINSTEIN and J. L. BASDEVANT

Laboratoire de Physique Théorique et Hautes Energies - Orsay

(*Nuovo Cimento*, **35**, 460 (1965))

The statement made in footnote ⁽⁷⁾ (p. 465) about the work of M. KONUMA and Y. TOMOZAWA (now published in *Phys. Lett.*, **10**, 347) is mistaken: actually their results coincide with ours.
