The *CPT* Theorem and Odd-Dimensional Space-Time.

A. C. MANOHARAN

Department of Physics, University of Wisconsin-Milwaukee - Milwaukee, Wis.

(Lett. Nuovo Cimento, 1, 125 (1969))

A line of manuscript got inadvertently omitted in printing and this was unfortunately beyond the control of the author since proofs were not sent to him. The third sentence of the second paragraph of the article should read as follows:

As pointed out by Jost ⁽⁴⁾ *CPT* is a direct consequence of the fundamental physical assumptions of Wightman's quantum field theory ⁽⁵⁾ with the local commutativity assumption replaced by one of only weak local commutativity in neighborhoods of Jost points.
