Angular Distribution in Pion Electroproduction.

N. ZAGURY

*Physics Department, Harvard University - Cambridge, Mass.**(Nuovo Cimento, 52 A, 506 (1967))*

There are some transcription errors in this paper: in eq. (2.4) the denominator in the term containing F_4 should read q^2 instead of qk ; in eq. (3.1) the term in W_4 should be read εW_4 ; in eq. (3.2) one should read π^3 instead of π^2 ; the left-hand side of eq. (3.6) should be multiplied by « -2 »; eq. (3.3) should read:

$$\varepsilon = \frac{(-\lambda^2 m^2 / 2 W^2 k^2) \operatorname{ctg}^2(\alpha/2)}{1 - (\lambda^2 m^2 / 2 W^2 k^2) \operatorname{ctg}^2(\alpha/2)}.$$

None of these transcription errors affects the results of the paper.
