Erratum

In the article, "Black and White College Women's Maternal Employment Outcome Expectations and Their Desired Timing of Maternal Employment," by Judith S. Bridges and Claire Etaugh [*Sex Roles*, 35(9/10), 543-562], on page 555 in Table III, the following values require further clarification with regard to probability footnotes. Under the column "Whites," Years of mother's employment, $B = -.14^a$, Expectation of personal benefits, $B = -.05^a$, and Expectation of children's costs, $B = .09^c$. Under the column "Total," Years of mother's employment, $B = -.13^b$, Expectation of personal benefits, $B = -.04^a$, and Expectation of children's costs, $B = .06^c$. ($^ap < .05$, $^bp < .005$, $^cp < .0005$.)
