Comment on the Prediction of the $e^+e^- \rightarrow n\bar{n}$ Cross-Section To Be Remarkably Larger than the $e^+e^- \rightarrow p\bar{p}$.

S. DUBNIČKA

INFN, Laboratori Nazionali di Frascati - Frascati, Roma

(*Nuovo Cimento A*, **103**, 1417 (1990))

PACS 12.20 - Quantum electrodynamics.

PACS 99.10 - Errata.

The last two expressions in (1) should read

$$G_E^n(t) = [F_1^s(t) - F_1^v(t)] + \frac{t}{4m_n^2} [F_2^s(t) - F_2^v(t)],$$

$$G_M^n(t) = [F_1^s(t) - F_1^v(t)] + [F_2^s(t) - F_2^v(t)].$$

On p. 1419, in the sixth line of the fifth indention instead of $\phi'''(2150)$ should be $\rho'''(2150)$.

In the last expressions of p. 1421 instead of $f_{\phi' N\bar{N}}^{(1)}/f_\phi$ should be $f_{\rho' N\bar{N}}^{(1)}/f_\rho$.

On p. 1422, the linearly dependent coupling ratios on the results (5) take the following correct numerical values:

$$f_{\phi' N\bar{N}}^{(2)}/f_{\phi'} = -0.5912 \pm 0.0440; \quad f_{\rho' N\bar{N}}^{(2)}/f_{\rho'} = 1.3135 \pm 0.3905.$$

Figure 7 on p. 1425 is incorrect due to a computer program error in a calculation of the cross-section behaviour for neutron-antineutron pair in the final state. It should be replaced by the following figure:

Fig. 7.

On p. 1426 in ref. [8] instead of Cesselini should be Cesselli.
