The following errata should be noted in the above-mentioned paper:

i) In eqs. (4)-(10) and in table II, block letters mean longitudinally polarized hadrons.

ii) On the first line after eq. (11), instead of $B_{\lambda_a \lambda'_a}^M$ read $B_{\lambda_a \lambda'_a}^M$.

iii) In eqs. (12) and (21) all symbols ∂ should read $\vec{\partial}$.

iv) Equation (16) should read:

$$(16) \quad \varphi_a = \exp [-C_a \gamma_5 / 2] .$$

v) On the first line of page 613 instead of $A_{ib \rightarrow iq}$ read $A_{ib \rightarrow ib}$.
