EDITORIAL

The Trustees of the Carlsberg Laboratory have decided to discontinue the publication of Carlsberg Research Communications with the completion of Volume 54, 1989.

The decision was taken because an increasing number of scientists and visitors working at the Carlsberg Laboratory prefers to publish their work in other journals. *Comptes Rendus des Travaux du Laboratoire Carlsberg* and its successor Carlsberg Research Communications aimed at informing comprehensively about the scientific work at the Carlsberg Research establishments. This is no longer possible, when the majority of the results is published in other scientific journals.

It is a great pleasure to thank Springer-Verlag for the excellent service in distributing the journal over the last 13 years, to Bording Grafik for high quality printing, the Editorial Board and referees as well as S.W. Rasmussen, Hanne Them Nielsen and Lise Trillot for their enthusiastic help in improving the manuscripts. Last but not least the Journal is indebted to the authors who have made the Journal a success over the last 111 years.
