Berichtigung

B. Reiser: Structural Inference for Linear Regression with Autocorrelated Errors. 16. Jahrgang, 1975, Heft 2.

Formula (3.2) on page 89 should be multiplied by σ^{-r} .

On page 90 the expressions for $\underline{t}$ and $\underline{\beta}$ should read:

$$\underline{t} = (\underline{\beta} - \underline{b}(\underline{Y}) - s(\underline{Y})\underline{f}) / (s(\underline{Y})K^{1/2})$$

$$\underline{\beta} = \underline{b}(\underline{Y}) + s(\underline{Y})\underline{f} + s(\underline{Y})K^{1/2}\underline{t}$$
