ERRATA

IN *Dynamic Aspects of Electrolyte and Water Transfers in Human Blood after Morphine* by Manfred Meyer, M.D., CANADIAN ANAESTHETISTS' SOCIETY JOURNAL, vol. 15, no. 6 (November 1968), page 554, the following corrections are to be made.

Page 555

Paragraph 1

The second sentence should read:

Blood samples were taken before and one hour after 12 mg morphine hydrochloride per square metre body surface intramuscularly, using all glass syringes or special syringes made from Piacryl P®.

Paragraph 4

The first sentence should read:

Haemoglobin concentration was measured as cyan-haemoglobin using Acuglobin plus Aculute (Ortho Pharmaceutical Corp., Raritan, New Jersey) as a standard.

The last sentence should read:

The significance of the results were determined by the *t*-test and/or the sign test.

Last paragraph

The third sentence should read:

These P_{aCO_2} values are 1 to 2 mm Hg lower than the "alveolar" end-expiratory CO_2 tensions measured by Eckenhoff et al after morphine sulphate.

Page 559

Second and the third paragraphs

In the last sentence of each the words "an organic" should read "inorganic."
