New Lower Cambrian trilobites from Pleistocene erratic boulders of northern Germany and Denmark and their bearing on the intercontinental correlation

GERD GEYER, Würzburg; ADRIAN POPP, Lehrte; THOMAS WEIDNER, Rårup & LUTZ FÖRSTER, Bad Malente

Auf Grund eines Versehens wurde die Abb. 4 im Beitrag GEYER et al. (Paläontologische Zeitschrift **78** (1): 127–136) falsch beschnitten. Daher wird an dieser Stelle eine korrigierte Version nachgeliefert.

Inadvertently, Fig. 4 of the contribution GEYER et al. (Paläontologische Zeitschrift **78** (1): 127–136) was cut incorrectly. Consequently, we here provide a substitute version.

Fig. 4. New Lower Cambrian trilobites from Pleistocene erratic boulders. – **1, 3–15:** *Epichalnipsus anartanus* n. gen., n. sp. Cranidia, all $\times 2.5$ (except for Fig. 1.5); **1.** PIW 2002-VIII-3, paratype, internal mold, dorsal view; Ulbjerg Klint; **3, 6, 9.** PIW 2002-VIII-1a (larger specimen on left, holotype) and PIW 2002-VIII-1b (paratype), together with undetermined brachiopod, all internal molds, Sandesneben; **3:** dorsal view; **6:** anterior view; **9:** left later-

al view. **4.** LFM 2002-I-3a, paratype, largely exfoliated cranium showing pattern of lateral glabellar furrows and faint crestline on glabella; Sieversdorf; **5.** PIW 2002-VIII-1d, paratype, partial cranidium, latex cast of exterior surface; Sandesneben, $\times 5$; **7.** APG 2002-I-9a, paratype, internal mold of anterior part of cranidium with acute frontal lobe, latex cast; note L3; Krähenberg near Wilsche; **8.** APG 2002-I-6, paratype, latex cast of internal(?) mold; Eixe; **10, 13, 14.** APG 2002-I-1, paratype, internal mold, Burgdorf; **10:** right lateral view; **13:** dorsal view; note slightly extended anterolateral corners of the glabella; **14:** anterior view; **11.** APG 2002-I-9c, paratype, latex cast of partial cranidium, internal mold with clearly developed lateral glabellar furrows, Krähenberg near Wilsche; **12, 15.** APG 2002-I-2, partial cranidium, paratype, counterpart of APG 2002-I-1, latex cast of external mold, Burgdorf; note faintly bifid proximal part of eye ridge. – **2:** *Hexatheca?* sp. APG 2002-I-9n, latex cast of internal mold, dorsal view; Krähenberg near Wilsche, $\times 4$.
