Erratum

Complete Theoretical ESR Powder Spectra by Analytical and Monte Carlo Methods [Appl. Magn. Reson. 10, 1–27 (1996)]

V. Beltrán-López

Misprints have been found in Table 1 on page 17. Correct version of table is given below:

Table 1. Time for calculating and plotting full theoretical powder ESR spectrum of $S = 5/2$, $M_s = 1/2 \leftrightarrow -1/2$ transition in axial field.

Analytic powder pattern. Numerical convolution. 300 steps*	920 s
Fully analytic solution*	80 s
Monte Carlo. Dell Pentium 90 MHz PC*	41591 s
Monte Carlo. Cray YMP4-64 Supercomputer	47 s
Monte Carlo. DEC-ALPHA 3000. 175 MHz	19 s

* Run with Mathematica program in Dell Pentium 90 MHz PC.
All Monte Carlo spectra from $3.5 \cdot 10^6$ points in 400 channels.
