Due to an oversight, an incorrect version of Fig. 3 has been printed in the above article (*J. Plant Biochem. Biotech* 1: 1-4, 1992). The correct version along with the legend is given below.

Fig. 3. The position of various genes on the *Pst*I and *Kpn*I generated physical map of *V. aconitifolia* which is based in part also on the information concerning *V. radiata* cpDNA (8). The sizes (kb) of various fragments generated by *Pst*I and *Kpn*I are also given. Abbreviations: IR, inverted repeats; LSC, large single copy region; SSC, small single copy region.
