ERRATUM

With regard to the Article "Methodologic challenges of randomized controlled studies on in-home comprehensive geriatric assessment: The EIGER project." by A.E. Stuck, H. Gafner Zwahlen, B.E. Neuenschwander, R.A. Meyer Schweizer, G. Bauen, and J.C. Beck (Aging Clin. Exp. Res. 7: 218-223, 1995), the authors apologize for having overlooked errors in Table 1. Table 1 was erroneously based on preliminary, and not on final counts. For the following definitions, the numbers were incorrect and must be replaced with the following correct numbers:

- Basic ADL 67 (8%)
- Depression 80 (10%)
- Low Risk 444 (56%)
- High Risk 347 (44%)

The authors regret any inconvenience caused by these errors.
