Erratum

The figure 2 of the article “Effect of hypoxia on monocyte chemotactic protein-1 (MCP-1) gene expression induced by Interleukin-1 β in human synovial fibroblasts” by O. Safronova, K. Nakahama, M. Onodera, T. Muneta, and I. Morita published in Volume 52/11 (2003), pp. 480–486 in the journal Inflammation Research was misprinted. The correct figure is as follows:

Fig. 2. Time course of the down-regulation of IL-1 β -stimulated MCP-1 by hypoxia in RASF. Cells were treated with 10 ng/ml IL-1 β and cultured under normoxic (open bars) or hypoxic (filled bars) conditions for the indicated time periods. **A.** MCP-1 mRNA expression was analyzed by quantitative real-time PCR. MCP-1 expression was normalized by GAPDH and is shown as a percentage of expression after 6 h of IL-1 β treatment under normoxic conditions. Data represent the means $\pm$ SEM ($n = 3$). **B.** MCP-1 protein secretion into culture supernatants determined by commercial ELISA kit. Data are shown as means $\pm$ SEM ($n = 3$). ** $p < 0.01$ vs. normoxia at each time point. The results are representative of two independent experiments.
