Erratum to:
“Pointwise Asymptotic Stability of Steady Fluid Motions”,
***J. math. fluid mech.*, DOI 10.1007/s00021-007-0262-x**

Paolo Maremonti

Mathematics Subject Classification (2000). 35Q30, 76D03, 35B40.

Keywords. Navier–Stokes equations, asymptotic stability, maximum modulus theorem.

The proof of Lemma 4.5 is incomplete. In fact, it requires that the upper bound $\sup_{\|\phi_0\|_r=1} |(U^1(t), \phi_0)|$, $\phi_0 \in J^r(\Omega)$, is given by a constant c independent of r . However, as kindly pointed out to me by Paolo Galdi, the argument I used in the proof of this latter contains a gap. I am not yet aware of whether or not this gap can be filled. Hence, the results of Theorem 4.1 concerning the linearized problem (4.1), and, as a consequence, the results of Theorem 2.1 of nonlinear problem (1.1) remain to be proved.
