Erratum

In the recent article by J. Straka and H. Feldhaar “Development of a chemically defined diet for ants” (*Insect. Soc.* **54**: 100-104, DOI 10.1007/s00040-007-0910-4), two unfortunate errors slipped in Table 1 on page 101 with the nutrient composition of the diet. The correct version of this part on the Carbohydrates (right below in the Table) is as follows:

For a final volume of 100 ml, 1 gram of Agar as well as 20 gram of sucrose (20% w/v) have to be added to the chemically defined diet.
