Erratum to: Naturwissenschaften DOI 10.1007/s00114-010-0670-2

Unfortunately, there are two errors in the original manuscript which require correction to ensure repeatability of our methods;

- (1) The amount of food offered to the animals in the Restricted Diet treatment should have been reported as 75%, and not 70%, of *ad libitum* intakes (see Abstract, line 18, and Methods, paragraph 1, line 20).
- (2) The amounts of food offered to animals in the Unpredictable Diet treatment were reported incorrectly. The Unpredictable Diet treatment actually consisted of five possible and randomly allocated feeding levels of 0%, 30%, 70%, 100% and 120% of *ad libitum* intakes (see Methods, paragraph 1, line 21).

These corrections do not impact the outcomes or the biological or statistical significance of the results.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s00114-010-0670-2>.
