Unfortunately, there were two mistakes in this paper. The authors state that the Botnia sample was non-diabetic at baseline, whereas in fact most of the Botnia sample was non-diabetic at baseline. Furthermore, the per allele increase in BMI for the minor A allele at rs9939609 is given as 0.13 kg/m² for the Swedish cohort, whereas it should read 0.24 kg/m². These mistakes do not affect the conclusions made in the paper.
