The Rio Itapicuru greenstone belt, Bahia, Brazil: geologic evolution and review of gold mineralization

Published online: 7 November 2001
© Springer-Verlag 2001

Mineralium Deposita (2001) 36:345–357

It should have been stated in the legend of the schematic block diagram (Fig. 2) in this paper that the figure was originally from the referenced paper by Chauvet et al., 1997. In addition, on page 347, the data for the strain analysis were also from Chauvet et al., 1997.

On page 348, the authors refer to ages presented in the article by Alves da Silva, 1993, whereas these ages should have been referenced as having been published in a second article by Chauvet et al. 1997 (C.R. Acad. Sci. Paris, vol 324, pp. 293–300). Moreover, on page 349, table 1, the $^{40}\text{Ar}/^{39}\text{Ar}$ of 2.02 Ga obtained on “whole rock” should have been stated as for a biotite concentrate.

The online version of the original article can be found at
