When we published the article

Large M et al (2008) Evidence for a relationship between the duration of untreated psychosis and the proportion of psychotic homicides prior to treatment. Soc Psychiatry Psychiatr Epidemiol 43(1):37–44 [The online version of the article can be found at: <http://dx.doi.org/10.1007/s00127-007-0274-0> (published online 24 October 2007)] a typo in the first paragraph of the Results-section remained unnoticed.

Instead of:

A relationship was found between average Mean DUP and the proportion of homicides in FEP using unweighted and untransformed variables ($R = 0.694$, $R^2 = 0.484$, $t = 3.20$, $P = 0.008$), however a possible relationship between average Median DUP and the proportion of homicides in FEP just failed to reach significance ($R = 0.570$, $R^2 = 2.56$, $t = 2.195$, $P = 0.053$).

the paragraph more correctly should read:

A relationship was found between average Mean DUP and the proportion of homicides in FEP using unweighted and untransformed variables ($R = 0.694$, $R^2 = 0.484$, $t = 3.20$, $P = 0.008$), however a possible relationship between average Median DUP and the proportion of homicides in FEP just failed to reach significance ($R = 0.570$, $R^2 = 0.256$, $t = 2.195$, $P = 0.053$).
