Erratum to: Bull Environ Contam Toxicol DOI 10.1007/s00128-015-1523-7

There was a mistake in the presentation of the accession number of reported strains in the online published article which has been corrected now.

Please read, “16s rDNA analyses have confirmed following strains with GenBank accession numbers: *Bacillus thuringiensis* PS-1 (KC 355253.1), *Azotobacter chroococcum* PS-2 (JX913866.1), *Paenibacillus ehimensis* PS-4 (FN582330.1), and *Pseudomonas pseudoalcaligenes* PS-5

(AB109887.1)” as “16s rDNA analyses have confirmed following strains with GenBank accession numbers: *Bacillus thuringiensis* PS-1 (KJ511861.1), *Azotobacter chroococcum* PS-2 (KJ607246.1), *Paenibacillus ehimensis* PS-4 (KJ511862.1), and *Pseudomonas pseudoalcaligenes* PS-5 (KJ588061.1)”.

The accession numbers were wrongly uploaded on NCIB database and the authors were unaware about it. The correct accession numbers are provided here. Also, the typological error “NICM” should read as “NCIM” throughout the article.

The online version of the original article can be found under doi:[10.1007/s00128-015-1523-7](https://doi.org/10.1007/s00128-015-1523-7).
