Erratum zu: Netze in der Primär- und Rezidivtherapie des Prolapses. Ein Update

Im vorletzten Absatz des Abschnitts „Descensus genitalis“ (S. 415) wurde ein Sachverhalt zur Thematik der Level-II-Defekte falsch dargestellt. Richtig muss es heißen:

„Beim zentralen Defekt zeigt sich klinisch eine Pulsationszystozele, beim lateralen Defekt dagegen eine Traktionszystozele“.

Die Autoren bitten, den Fehler zu entschuldigen.
