The electronic supplementary material of this article
contained two errors.

Correction 1

In column 2 of Table 7, the last disorder under “Pulmonary
disorders” should be “Respiratory failure associated with
positive-pressure breathing” and not as published.

Correction 2

Only SI units should be used in the equation for estimates
of the serum sodium concentration corrected for the
presence of hyperglycaemia and not as published. The
correct equation is as follows:

$$\begin{aligned} &\text{Corrected serum (Na}^+) \\ &= \text{measured (Na}^+) + 2.4 \times \frac{(\text{glucose (mmol/l)} - 100 \text{ (mmol/l)})}{100 \text{ (mmol/l)}} \end{aligned}$$

$$\begin{aligned} &\text{Corrected (Na}^+) \\ &= \text{measured (Na}^+) + 2.4 \times \frac{(\text{glucose (mmol/l)} - 5.5 \text{ (mmol/l)})}{5.5 \text{ (mmol/l)}} \end{aligned}$$
