Erratum to: Intensive Care Med (2015) 41:68–76 DOI 10.1007/s00134-014-3566-3

Owing to an oversight by the authors during editing and revision of the manuscript, incorrect data appear in the abstract and the results section regarding the number of patients with worsening renal function.

The correct text is as follows:

In the abstract: “One hundred eleven patients formed the cohort, of whom 41 had worsening renal function.”

In the results section: “Among 41 patients developing WRF, 14/41 had new AKI and 27/41 patients already had AKI at admission”.

The same numbers apply to Fig. S2 in the electronic supplementary material.

Furthermore, the legends for Figs. 1 and 2 were inadvertently transposed.
