Research in Engineering Design (RED) is proud to announce the appointment of Professor Yoram Reich as a new Co-Editor-in-Chief of the journal. Professor Reich brings with him industrial experience in the audio, marine, and structure industries including serving as the chair of Israel Chapter (319) of the Society of Manufacturing Engineers. He has over 20 years of research in engineering design in diverse topics. Professor Reich is the head of the design and CAD specialization track in the School of Mechanical Engineering at Tel Aviv University and director of the Computational Systems Research Laboratory.

Research in Engineering Design is one of the leading design research journals and is undergoing some major changes, including a transfer to new publication management system and reorganization to help it create a new vision for engineering design research. This will help it address new challenges, including the diversification of design research topics and the increase in submissions from around the world, and in particular from Asia.
