This article has been retracted at the request of the authors. The reason is that the authors have stated that the number of patients at time points investigated as well as data regarding pain levels and functional outcome are incorrect. They would like to express their regrets to the Editor-in-Chief and the whole Editorial Board.

The online version of this article contains the full text of the retracted article as electronic supplementary material.

Electronic supplementary material The online version of this article (doi:[10.1007/s00167-015-3909-9](https://doi.org/10.1007/s00167-015-3909-9)) contains supplementary material, which is available to authorized users.
