Figure 3 of this article was published with an incorrectly edited version of the figure legend. The figure is reproduced here with the correct legend.

Fig. 3 Typical ultrasound findings **a** in a normal patient, **b** in a patient with unilateral avulsion of the pubovisceral muscle, and **c** in a patient with bilateral avulsion, as documented in slices at the level of the hiatus and at 2.5 mm and 5 mm above the hiatus. The defects are indicated by stars
