Erratum

Error in J. A. Rea et al.: 'Visual assessment of vertebral deformity by X-ray absorptiometry: a highly predictive method to exclude vertebral deformity'. *Osteoporos Int* 2000;11:660–8

SIR – The above paper was recently published in *Osteoporosis International*. Unfortunately it has been pointed out to us that there is an important error in Fig. 3. In this figure the y-axis labels were accidentally reversed such that they did not correspond to the key on the graph, i.e., what was labeled as 'I' in the key actually refers to the bars labeled 'III' on the graph itself. A corrected version of this figure appears below.

J. A. REA
*Osteoporosis Screening and Research Unit,
16th Floor Guy's Tower, Guy's Hospital,
London SE1 9RT, UK*

Percentage of XSQ vertebral deformities in analyzable vertebrae identified by VXA according to the grade and type of deformity.
