Arch Toxicol (2005). DOI: 10.1007/s00204-005-0669-2

There have been printing errors in Tables 2 and 3 of the paper. These are corrected as follows:

Table 2 Protein levels of cytokines and chemokines in BAL supernatants after challenge with DEP

Group	<i>n</i>	IL-4	IL-5	KC	MIP-1 α
Vehicle	18	66.3 $\pm$ 11.0	4.93 $\pm$ 1.73	62.8 $\pm$ 10.2	22.4 $\pm$ 11.3
DEP	18	146.7 $\pm$ 14.0*	14.55 $\pm$ 8.75	449.3 $\pm$ 47.4**	161.4 $\pm$ 9.6**

All values are in pg/total BAL supernatants. Results are mean $\pm$ SEM

n number of animals

BAL fluid from mice were obtained 24 hours after the last administration of vehicle or DEP. Interleukin (IL)-4, IL-5, keratinocyte chemoattractant (KC), and macrophage inflammatory protein (MIP)-1 α levels in the BAL supernatants were measured by enzyme-linked immunosorbent assays

P* < 0.05 versus vehicle group, *P* < 0.01 versus vehicle group

Table 3 Protein levels of cytokines and chemokines in the lung tissue supernatants after challenge with DEP

Group	<i>n</i>	IL-4	IL-5	KC	MIP-1 α
Vehicle	18	193.2 $\pm$ 13.1	1.64 $\pm$ 1.10	59.2 $\pm$ 18.7	17.9 $\pm$ 8.1
DEP	18	238.3 $\pm$ 17.0*	0.53 $\pm$ 0.53	241.0 $\pm$ 36.5*	145.9 $\pm$ 31.7*

All values are in pg/total BAL supernatants. Results are mean $\pm$ SEM

n number of animals

Lungs from mice were obtained 24 h after the last administration of vehicle or DEP. IL-4, IL-5, KC, and MIP-1 α levels in the lung tissue supernatants were measured by enzyme-linked immunosorbent assays

**P* < 0.01 versus vehicle group
