DOI 10.1007/s00204-013-1112-7

Due to an unfortunate oversight, a mistake was made in the Fig. 1 legend (p. 2033). Readers should note that the elements in blue colour are reported to be up-regulated/activated/increased, while the elements highlighted in red colour are reported to be down-regulated/inhibited/decreased following in vivo exposure to La^{3+} , not the other way round as falsely indicated.
