Erratum to: Arch Toxicol DOI 10.1007/s00204-016-1722-y

Authors would like to correct the errors in the published article. The first sentence of the second paragraph of the materials and methods section needs to be changed to: “Dimethylsulfoxide (DMSO; Sigma-Aldrich) was used as a vehicle for DNCB, MBT, caprylic acid, and parabens.”

The two EC50_{sens} values for caprylic acid in LCSA setup B and C were accidentally interchanged. The fourth sentence of the second paragraph of the results section needs to be changed to: “Thus, EC50_{sens} was >252 µmol/l (setup A), >219 µmol/l (setup B), and >669 µmol/l (setup C).” In the last row of Table 1, EC50_{sens} should be “>219” in column B and “>669” in column C.

The online version of the original article can be found under doi: [10.1007/s00204-016-1722-y](https://doi.org/10.1007/s00204-016-1722-y).
