Unfortunately, this article was published with errors. The corrections are given below.

In the legend of Fig. 2 it should read Nicotine (30 μ M) instead of (30 mM).

In the second last paragraph of the Introduction (unpublished data) should be removed.

In Fig. 7 a the dark colour is control and the light colour is neostigmine.

In the Discussion, the paragraph which starts with "The question remains why yohimbine..." it should read: release both Ach and ATP....instead of release both NA and ATP...

The authors apologize for any inconvenience these mistakes might have caused.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s00210-007-0198-y>.
