Regrettably, Faraday's constant F is missing in the second exponential term of Eq. 4, which should read

$$j_{\text{Na}^+} = \frac{I_{\text{Na}^+}}{A} = F \cdot c_{\text{Na}^+} \cdot k_0 \cdot \exp\left(\frac{-E_a}{R \cdot T}\right) \cdot \exp\left(\frac{F \cdot q \cdot a \cdot E}{2 \cdot R \cdot T}\right) \quad (4)$$

The values for E_a in Table 2 were calculated with the correct form of Eq. 4.
