The authors would like to call the reader's attention to the fact that in the published article there is a short paragraph in the section "Results" under "Turbulent flow chromatography recovery" that needs correction.

The paragraph should correctly read:

Turbulent flow extraction recovery was assessed by comparing the direct injection to turbulent flow injection of MN, NMN, MN-d3, and NMN-d3 spiked in EP_A ($n=2$). Absolute recovery of MN, NMN and their IS ranged from 56.4 % to 62.4 %, and the relative recovery of MN and NMN was 90.9 % and 97.8 %, respectively (Table S1 in the Electronic supplementary material (ESM)).

The online version of the original article can be found at <http://dx.doi.org/10.1007/s00216-012-5768-2>.
